

Advanced Placement United States History Summer Reading 2016

Make It Stick: The Science of Successful Learning

Make It Stick: The Science of Successful Learning will not teach you more about American history, or even the process of investigating the past. Rather, it challenges our ideas about how the human brain absorbs and retains new information, and what constitutes effective learning and studying. It is our hope that, having read this book, you will be better prepared to succeed in a challenging course like AP US History, and to do so in a way that won't unnecessarily tax your time and energy. As you read, consider how your current studying habits do or do not support meaningful learning.

Please read the text carefully. You should be prepared to discuss the major claims of the book, as well as how you might apply the authors' claims into your own learning this year.

Should you have a question please contact any of us:

Mr. Bolos (boloss@newtrier.k12.il.us)

Mr. Heineman (heinemad@newtrier.k12.il.us)

Mr. Klein (kleina@newtrier.k12.il.us)
