STUDENTS

SPECIAL EDUCATION EVALUATION

The administrators responsible for special education services shall develop procedures by which a case study evaluation may be requested for a student who exhibits problems which interfere with the student's educational progress and/or adjustment to the educational setting or who may require special education services. These procedures shall:

1. designate the steps to be taken in making a referral;
2. designate the person to whom a referral shall be made; and
3. indicate the information which should be provided.

In the event a student is referred for evaluation within a time frame of less than 60 student attendance days left in the school year, a determination of eligibility for the student to receive special education services shall be made prior to the first day of the following school year.
