New Trier Health Services

School Health Requirements for Transfer Students

Students are required to provide a copy of a current physical and documentation of immunizations in compliance with Illinois regulations.

The following pages include:

State of IL Certificate of Child Health Exam form: Required physical exam to be completed by physician and parent. Please note any health conditions, disabilities and medications taken on a regular basis. In some circumstances, a copy of a school physical from previous school may meet the Illinois requirement.

Guidelines for Health Examinations and Immunization Records: Outlines Illinois requirements for physical exam, immunizations, and medical and religious objections.

Medication Authorization form: Any medication administered or carried at school requires both **physician** and **parent** signatures, including over the counter medications. Students may carry Epinephrine, Benadryl, and Insulin with a signed Medication Authorization form on file. Generic Tylenol, Advil, and Benadryl are stocked in Health Services and can be administered with this written consent.

Forms can be mailed, faxed or emailed. Please keep a copy for your records. Contact a nurse in Health Services with questions or concerns.

NEW TRIER HIGH SCHOOL HEALTH SERVICES

Guidelines for Health Examinations and Immunizations Records

1. Student health records are required in compliance with Illinois law. A **physical examination is required within one year prior to the date of entering school** for all incoming freshman and for students transferring from out of state. Students transferring to New Trier from an Illinois high school may provide a copy of the physical exam from their former school. Students also must have immunizations completed as specified by the Illinois Department of Public Health (see below). Health forms may be downloaded from the New Trier Health Services website: http://www.newtrier.k12.il.us/HealthServices/. *(Reference: New Trier Guidebook; Illinois Department of Public Health Rules and Regulations; Illinois Administrative Code part 665; School Code of Illinois 105/ILCS527-8.1).*

2. **Immunization History** must include specific dates (month, date, and year) and include at least the minimum number of doses at the intervals noted below:

   A. **Diphtheria, Pertussis, Tetanus**: Requires a minimum of three doses, no less than 28 days apart. The last dose must be given on or after the fourth birthday and no earlier than six months after the former dose. A booster is required every 10 years.
   All students entering high school must provide evidence of having received one dose of Tdap.

   B. **Polio**: Requires a minimum of three doses of the same type of polio vaccine or four doses if any combination of polio vaccine types is given. The minimum interval between doses is 28 days. The final dose must be received on or after the fourth birthday.

   C. **Hepatitis B:** Requires a series of three doses. The first two doses must be no less than 28 days apart and the interval between the second and third doses at least 56 days. The interval between the first and third dose must be at least 4 months.

   D. **Measles**: Requires two doses, the first on or after the first birthday and the second at least 28 days later.

   E. **Mumps**: Requires two doses, the first on or after the first birthday and the second at least 28 days later.

   F. **Rubella:** Requires two doses, the first on or after the first birthday and the second at least 28 days later.

   G. **Varicella (Chickenpox):** Requires two doses, the first on or after the first birthday and the second at least 28 days later. History of disease must be verified by the examiner and documented on the Certificate of Child Health Exam Form under Alternative Proof of Immunity.

   H. **Meningitis (MCV4):** For Freshman, Sophomore and Junior students: Requires one dose on or after the 11th birthday. For Seniors: Requires one dose on or after the 11th birthday and a second dose after the 16th birthday. If the first dose is given after the 16th birthday only one dose is required.

3. **Medical Contraindication:** Requires a health care provider's statement detailing the specific medical condition that prevents the child from receiving the vaccine and its projected duration. If the condition of the child later permits immunization, the requirement will have to be met.

4. **Religious Exemption:** Requires the filing of a signed statement detailing objections to physical exam, health screenings, and/or immunizations on religious grounds. This statement must be signed by the health care provider responsible for performing the child's health exam. The signature indicates that they have provided the parent with information about the benefits of immunization and health risks of communicable disease. Form: http://www.dph.illinois.gov/sites/default/files/forms/religious-exemption-form-081815-040816.pdf

5. In case of infectious disease outbreak, unprotected students must be excluded from school as directed by the Illinois Department of Public Health.

Medication Allergies:_____

NON-PRESCRIPTION MEDICATIONS

Health Services keeps these medications in stock: Ibuprofen (Advil), Acetaminophen (Tylenol), and Diphenhydramine (Benadryl). All other non-prescription medications must be brought to Health Services by a parent/guardian in a manufacturer-labeled container. Over-the-counter medication authorized by parent and physician are valid until graduation unless otherwise specified.
Please authorize medication administration by checking appropriate boxes or filling in *other medication*:

- ☐ **Advil 2 tablets (200 mg each) every 6 hours as needed**
- ☐ **Tylenol 2 tablets (325 mg each) every 4 hours as needed**
- ☐ **Benadryl 1-2 tablets (25 mg each) for allergy symptoms or allergic reaction**
- ☐ ***Other medication***_____Dose_____Frequency_____

PRESCRIPTION MEDICATIONS

Medications for asthma, allergies, and diabetes:
With physician and parent authorization, a student may carry a labeled inhaler, EpiPen/Benadryl or Insulin and diabetic supplies. Please review item #4 on reverse side regarding self-administration.
Back-up medication stored in Health Services is encouraged in case of emergency.

Physician orders for:
Inhaler: _____
EpiPen/ Benadryl: _____
Insulin and glucose monitoring: _____
_____

Other Prescription Medications: ***Must be renewed at the beginning of each school year.***
All medications must be brought to Health Services by parent/guardian in a prescription-labeled container.

New Trier High School District 203
ADMINISTRATION OF MEDICATION TO STUDENTS

POLICY:
Parents/guardians have the primary responsibility for the administration of medication to their children. The administration of medication to students during regular school hours and during school related activities is discouraged unless necessary for the critical health and well being of the student. The administration of medication to students is subject to guidelines established by the Superintendent or designee, in keeping with state agency recommendations (e.g., Illinois Department of Professional Regulation, Illinois Department of Public Health, and Illinois State Board of Education).
Reference: Board Policy 7.270.

PROCEDURES/GUIDELINES:

1. **Medication Authorization Form** - School personnel shall not administer to any student, nor shall any student possess or consume *any prescription or non-prescription medication* except after filing complete medication authorization information. The school nurse reviews the written authorization and consults with the parent/guardian, licensed prescriber or pharmacist for additional information as necessary. Authorization and any subsequent changes includes:
    A. Physician, advanced practice registered nurse, physician's assistant, dentist, or podiatrist-licensed prescriber's written prescription
    B. Student's name, medication name, dosage and date of order
    C. Administration instructions (route, time or intervals, duration of prescription)
    D. Reason/intended effects and possible side effects
    E. Parent/guardian written permission.

2. **Appropriate Containers** - Medication and refills are to be provided in containers, which are:
    A. Prescription labeled by a pharmacy or licensed prescriber displaying Rx number, student name, medication, dosage, and directions for administration, date and refill schedule and pharmacist name.
    B. Manufacturer labeled, non-prescription over-the-counter medication.

3. **Administration of Medication** will be by Certified School Nurse, Registered Nurse, or school administrator. Parents must provide advance notice to the school nurse of field trips or other off campus activities. Other certified school personnel may also volunteer to assist in medication administration and may be given instructions by the nurse. If no volunteer is available, the parent/guardian must make arrangements for administration. The school nurse or administration retains the discretion to deny requests for administration of medication.

4. **Self-Administration -** A student may self-administer medication at school and activities if so ordered by his/her medical provider. Daily documentation will be provided as below (#6) for such health office supervised self-administration. For "as needed" medications such as those taken by students with asthma or allergies, the physician may also order that the student carry the medication on his or her person for his/her own discretionary use according to medical instructions, however no daily documentation will be possible in this case. Self-administration privileges may be withdrawn if a student exhibits behavior indicating lack of responsibility toward self or others with regards to medication. Parent signature on this form acknowledges that "the school district is to incur no liability, except for willful and wanton conduct, as a result of any injury arising from the self-administration of medication by the pupil and that the parents/guardians indemnify and hold harmless the school district and its employees and agents against any claims, except a claim based on willful and wanton conduct, arising out of the self-administration of medication by the pupil." (Reference IL PA 100-0799 & IL PA 96-1485)

5. **Stock Medications** - Acetaminophen, Ibuprofen and generic Benadryl are kept in stock at school as a courtesy to students, however a completed Medication Authorization Form must be provided for their use. In an emergency, a one-time dose may be given with phoned parent permission. A Medication Authorization Form will then be sent home for completion and no further doses will be provided without the completed form on file.

6. **Storage and Record Keeping** - Medication will be stored in a locked cabinet. Medication requiring refrigeration will be stored in a secure area. Each dose will be recorded in the student's individual health record. In the event a dose is not administered, the reason shall be entered in the record. Parents may be notified if indicated and it shall be entered in the record. To assist in safe monitoring of side effects and/or intended effects of the treatment with medication, faculty and staff may be informed regarding the medication plan. For long-term medication, written feedback may be provided at appropriate intervals or as requested by the licensed prescriber and/or parent/guardian.

7. **Documentation, Changes, Renewals, and Other Responsibilities** - To facilitate required documentation, medical orders, changes in medical orders, and parent permissions may be faxed to Health Services. It is the responsibility of the parent/guardian to be sure that all medication orders and permissions are brought to school, refills provided when needed, and to inform the nurse of any significant changes in the student's health. Medication remaining at the end of the school year must be released to a parent/guardian or it will be discarded. Every prescription medication order must be renewed each school year. Over-the-counter medication orders must also be renewed annually if specified by the physician.
